

Software Duplication & Use Policy

Wake Forest University licenses the use of its computer software from a variety of companies. The University does not own that software or its related documentation and, unless authorized by the software developer, does not have the right to reproduce it.

Unauthorized duplication or use of software violates U.S. copyright law and exposes the individuals involved and the University to possible civil and criminal liability. While licensing agreements differ slightly from one software company to another, the license fee generally entitles the licensee to use one copy of the software on one computer. It is usually legal to make a working copy to use with a floppy disk system or to copy onto the hard disk. The original may be kept in a safe place as a backup, and it is usually legal to have a copy of the program included with your system backup. Unless specifically authorized by the license agreement, it is not legal to have copies of the software running simultaneously on multiple machines or to use a single copy on a local area network.

The best policy for students, faculty, and staff to follow is that copying software for use on additional machines is prohibited unless told otherwise by an authorized individual. The University does not require, request, or condone unauthorized copying or use of computer software and such action is considered not to be taken in the course of employment. As a result, the University cannot provide legal defense for individuals accused of making unauthorized copies of software. If the University is sued or fined because of unauthorized copying or use by students, faculty, or staff, it will be required to seek payment from the individuals. They may also be subject to disciplinary action that may include dismissal. University policy requires that all students, faculty, and staff abide by the law and University contractual obligations.
